

## Team 3176 White Paper

Title: GRIPPER ARM	Author(s): JOSHUA REID
Sub-team/Function: mechanical; arm for elevator	Subject: Team 3176
Date :3/1/18	White Paper Number:

### Main Text

When I was working on the arm gripper prototype I learned what rev rail is and I learned how to do some simple pneumatics. We used REV rail as the frame and we used grip paper to create a grip for the power cube. One problem we ran into was stabilizing the arms because they were very wobbly and we couldn't tighten the nuts anymore or the arms wouldn't move.
